**POSITION: COASTAL ENGINEER**

**JOB OVERVIEW:**

Heavy Force Pvt Ltd is a leading marine construction firm based in Maldives. We are pleased to announce an immediate opening in our company for a mid-level Coastal Engineer. This position has tremendous growth and career development potential for a passionate engineer. The candidate will have the opportunity to work on a variety of coastal engineering projects with a concentration in beach nourishment, coastal structures, coastal protection etc., all of which may involve feasibility analyses, engineering designs and analyses, limited numerical modeling, report preparation, permitting, and construction engineering services. The selected candidate will perform tasks under the direction of a Professional Engineer through all phases of projects including the initial planning and design, permitting, construction and monitoring.

**RESPONSIBILITIES AND DUTIES:**

- Perform coastal engineering analyses and designs through the application of coastal theory
- Prioritize and accomplish multiple projects efficiently and effectively with limited Supervision
- Organize and interpret engineering data to prepare clear and concise engineering reports and technical documentation
- Assist in obtaining project permits and perform compliance monitoring for permits
- Prepare project construction plans and specifications
- Perform project construction observations, interpret contract documents, enforce contract specifications, and review submittals for accuracy, completeness and design consistency
- Ensure conformance to applicable engineering codes and standards as well as company policies and procedures
- Communicate with co-workers and clients in a professional manner including during meetings and presentations
